1 User Guidelines

1.1 System Introduction

Unsafe Condition Unsafe Action (UCUA) provides a complaint form system that is used in the Port Security & Safety Department (PSSD) to process, distribute, and complete report forms for unsafe activities. There are two types of the forms in UCUA known as Unsafe Condition Form (UC) and Unsafe Action Form (UA). This system will replace the traditional paper-based forms that are still in use today, because web-based forms are effective for obtaining data, keeping track of things, and acquiring information. There are two types of platforms applied to this system which is Desktop and Mobile. The Mobile version is a lite version from Desktop version. The main purpose for Mobile version only for reporting and checking report status. Further discussion about the feature for these platforms will be discuss below. Users can access the system via this link: http://apps.johorport.com.my/ucua300/login.

2 Desktop Platform

2.1 User Acceptance Testing Administrator Internal

No	Module	Description	Approve / Reject	Remark
1	Login	i) Admin username and password ii) Display error message if admin enters wrong credentials	Approve	
2	Forgot password	i) Validate email address entered ii) Send temporary password to user email iii) Update new password iv) Log in with new password	Approve	
3	Dashboard	i) Display bar charts of top 5 frequent questions, tutorial videos and manual for user. ii) Shortcut button for unsafe condition form, unsafe	Approve	

		action form and chatbot Eva iii) Display recent activity logs
